Business Accelerator/m2m

Innovative machine-to-machine (m2m) solutions are increasingly becoming part of our everyday lives. This growing market offers consumers numerous possibilities to improve their lives, by connecting the most important devices in their homes. Businesses, on the other hand, are more interested in how m2m solutions can open up new revenue streams and enable them to operate more cost-efficiently. By combining its expertise in the m2m market with an in-depth knowledge of its customers, KPN's Connect/m2m portfolio provides all the answers. **BusinessAccelerator/m2m**

Imagine...

... if your car could automatically contact your preferred (or nearest) repair centre, following a breakdown; with a full report on the repairs required, enabling the necessary spare parts to be procured in advance.

... if you were able to remotely turn your home's heating on or off via your smartphone, or another communication device, to warm up your home before you arrive or save energy, if it is not needed.

... if your doctor could monitor your condition remotely, enabling you to convalesce at home, instead of in a hospital bed.

With KPN's Connect/m2m, you no longer need to imagine, since all this and much, much more is already possible.

BusinessAccelerator/m2m

KPN's BusinessAccelerator/m2m programme places your business at its heart. It starts with KPN gaining an in-depth understanding of your business. Acting as a consultant and with the support of our extensive network of partners, KPN provides customised solutions for specific business situations.

Connect/m2m

KPN's Connect/m2m portfolio offers tailor-made m2m solutions for various vertical market segments. These are designed to accelerate your business by offering:

- 1 SIM card, 1 price and 1 contract for the whole of Europe
- very flexible pricing and rating models
- instant and automated provisioning
- real-time diagnostics
- business rules to prevent fraud
- specialised business support
- flexible billing solutions and service enablement

Together with our customers, we develop the best possible solutions to accelerate their business, whilst blending seamlessly with their own business models.
