Shanghai High-Flying Electronics Technology Co., Ltd

2017.1

Company Profile

Shanghai High-Flying Electronics Technology Co., Ltd, found in Oct 2011 , is a high-tech enterprises specialized in I.O.T communication domain and designs, develops, manufacture, markets, sells and provide total IOT solution to customers. From the **System Chipset, IOT Module, Network Device, Application Software, Enterprise cloud service to the APP terminal application** of all independent technology platform, High Flying become the most cost-effective provider of the whole industry chain intelligent hardware .

- **Total Headcount : 66**
 - ✓ Shanghai : HQ/Design Center (55);
 - ✓ Shenzhen/Guangzhou : Sales and FAE (10);
 - ✓ Beijing : Sales (1);
- **IOT Module Shipment : ~500K/Mon**
 - ✓ Smart Home
 - ✓ Industrial Control
 - ✓ Consumer
 - ✓ Health/ Medical
- **More than 800 Customers**

Main Products

IOT Module

(Wi-Fi/Zigbee/BT/GPRS/Wi-Fi SiP)

Application: Smart Home, Industrial Control, Consumer, Health/Medical Fields.

Network Device

(Super Ethernet Port, Serial Server, Gateway...)

Application :System integration, Business Management Industrial Control, Traffic Security Fields.

Cloud Service

(Public cloud , Private Cloud, APP)

Application: Ali ,JD, Suning, Amazon, IBM, Gizwits... mainstream domestic and international cloud platform.

Business Scenarios

Public Cloud (Ali/JD/Baidu...) , **Super APP** (Ali/WeChat...)

Private Cloud (Enterprise Server...), **Management Terminal** (PC/APP...)

Home/Health/Personal IOT Scene

Commercial/Industry IOT Scene

Focusing On I.O.T Communication Transmission Technical

**Wi-Fi Module ,
Access services**

**ZigBee Module /Gateway
Access services**

**BLE Module/Gateway
Access services**

**Super Ethernet Port/Serial Server/Smart
Gateway/Industry Route, Access Services**

**BLE Module/Gateway
Access services**

Smart Home

Security Sensor

Health Care

Equipment Monitoring

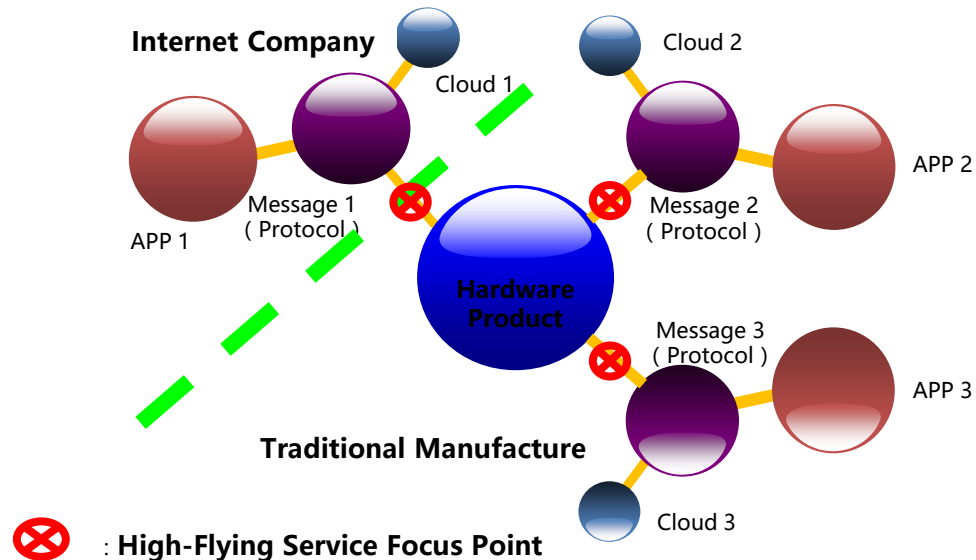

Smart Device

Intelligent Positioning

Company Position in I.O.T Market

- High-Flying is **I.O.T Software Service Provider (SW Outsourcing)**, we take most of **middle-ware software development** work which IC chipset company, cloud service company and hardware product company all not interested in or have no competence to do;
- We sale hardware Modules/Devices, **which as carrier** to carry customized software/cloud, and provide **Value-Added** outsourcing service to traditional manufacture;

High-Flying Market Overview

Energy Control

Typical applications include:

- PV inverter for solar power
- White goods- air conditioning
- Industry sensor networks
- Remote indoor climate control

Digital Media & Toys

Typical applications include:

- Web radio
- Wireless speakers
- Remote control toys
- Home security web cameras

Industrial Control

Typical applications include:

- Sensors for fire/smoke alarms
- Elevator signalization systems
- Security systems
- LED control

Retail

Typical applications include:

- POS terminals
- Wireless price tags
- Bar code readers
- Printers

Fitness & Healthcare

Typical applications include:

- Glucose meters, Oximeters
- Heart rate, blood pressure monitors
- Exercise equipment
- Weight and BMI scales

Tracking & Asset management

Typical applications include:

- Traffic information
- Location devices
- Intelligent packaging
- Logistics Management

High-Flying Customer Overview

 Electrolux

 **Growatt**
powering tomorrow

 **LEEDARSON**

 **BULL公牛**

 **comptime**

 **Etman**

 **LEVITON**

 **JOHNSON**

 **andon九安**

 **ECOVACS**

 **SHARP**

 **MNIK**
Omnik New Energy

 **Canon**

 **Joyoung九阳**

 **CANDY**

 **onbon**

 **futlight**

 **中兴昆腾**
ZTE Quantum

 **沁园 QINYUAN**

 **Changdi**
长帝

 **lumitek**

 **FLEXTRONICS X**

 **Whirlpool**
HOME APPLIANCES

 **HI-MIN**

 **Rosenberger**

 **ARISTON**
阿里斯顿

 **志高空调**
CHIGO

 **HeT**
Intelligent Control

 **LANDI 联迪**

 **LIFESENSE**
Transmting the future

 **世纪亚明照明**
创始于一九二三年

 **FLYCO 飞科**

 **艾美特**

 **SPRT 思普瑞特**

Wi-Fi Module Road Map

Phase Out █ Production █ Sample █ Plan █

Wi-Fi System-In-Package Chip HF-SIP120

Features

- ✓ World Smallest IOT Wi-Fi;
6*6, BGA Package , Pitch : 0.5mm;
- ✓ Zero Peripheral Components;
- ✓ Stable RF performance;
- ✓ Full SW OS and SDK package support;
- ✓ Provide SW burning and customized firmware development service;

Resource

- ✓ 802.11b/g/n , 1T1R , Soft AP/STA ;
- ✓ 32-bit CPU ;
- ✓ 192KB SRAM ;
- ✓ 2MB SPI Flash ;
- ✓ 10 GPIO, Support UART , I2C... itf ;

Wi-Fi High Performance Series Modules

HF-A11

HF-A21

HF-A11-SMT

HF-A21-SMT

Support

- IEEE802.11b/g/n Wireless Standards
- TCP/IP/UDP Network Protocols
- AT+ Instruction Set for Configuration
- FCC/CE/Telec Certificated
- Realtek solution

Support

- TCP/IP/UDP Network Protocols
- UART/GPIO/Ethernet Data Interface
- Friendly Web Configuration Page
- FCC/CE Certificated
- Mediatek solution

Support

- TCP/IP/UDP Network Protocols
- Internal/External Antenna Option
- AT+ Instruction Set for Configuration
- Smart Link Application Tools
- Realtek solution

Support

- IEEE802.11b/g/n Wireless Standards
- UART/Ethernet Data Interface
- Router/Bridge Mode Networking
- FCC/CE Certificated
- Mediatek solution

Wi-Fi Low Power Series Module

HF-LPB100

HF-LPB120

HF-LPB200

HF-LPB300

Support

- UART/SPI/PWM/GPIO Data Communication Interface
- Work As STA/AP/AP+STA Mode
- Wireless/Remote Firmware Upgrade
- FCC/CE/Telec Certificated
- Mediatek solution

Support

- IEEE802.11b/g/n Wireless Standards
- UART/GPIO Data Communication Interface
- WPS Function
- FCC/CE Certificated
- Single +3.3V Power Supply
- High Flying own soc

Support

- UART/SPI/PWM/ADC/GPIO Data Communication Interface
- PCB/External Antenna Option
- Single +3.3V Power Supply
- TLS/SSL and mDNS Protocol
- FCC/CE/IC
- Marvell solution

Support

- IEEE802.11b/g/n Wireless Standards
- UART/SPI/PWM/ADC/GPIO Data Communication Interface
- Work As STA/AP Mode
- Marvell Solution

Wi-Fi Low Power Tiny Series Module <1>

HF-LPT100F

HF-LPT100

HF-LPT120A

HF-LPT120B

Support

- Low-Power Applications with Excellent Power Save Scheme
- Maximum 5 Channel PWM
- Smart Link Function (APP provide)
- Multi-TCP Link (Upto 5) Connection
- Single +3.3V Power Supply
- Mediatek solution

Support

- Maximum 3 Channel PWM
- Work As STA/AP/AP+STA Mode
- Wireless and Remote Firmware Upgrade Function
- Multi-TCP Link (Upto 5) Connection
- FCC/CE Certificated
- Mediatek solution

Support

- UART/GPIO Data Communication Interface
- Smart Link Function (APP provide)
- Wireless and Remote Firmware Upgrade Function
- FCC/CE Certificated
- High Flying own SOC
- Internal/External Antenna Option

Support

- UART/GPIO Data Communication Interface
- Wireless and Remote Firmware Upgrade Function
- Internal/External Antenna Option
- Single +3.3V Power Supply
- High Flying own SOC

Wi-Fi Low Power Tiny Series Module <2>

HF-LPT120G

HF-LPT120

HF-LPT200

HF-LPT220

Support

- IEEE802.11b/g/n Wireless Standards
- UART/GPIO Data Communication Interface
- SmartLink Function (APP program provide)
- Wireless and Remote Firmware Upgrade Function
- Internal Antenna Option
- High Flying own SOC

Support

- IEEE802.11b/g/n Wireless Standards
- UART/GPIO Data Communication Interface
- Wireless and Remote Firmware Upgrade Function
- Internal/External Antenna Option
- High Flying own SOC

Support

- UART/SPI/PWM/GPIO Data Communication Interface
- Wireless and Remote Firmware Upgrade Function
- Multi-TCP Link (Upto 5) Connection
- Internal/External Antenna Option
- Single +3.3V Power Supply
- Mediatek solution

Support

- UART/GPIO Data Communication Interface
- Internal/External Pin Antenna Option
- Single +3.3V Power Supply
- Wireless and Remote Firmware Upgrade Function
- High Flying own SOC

BLE – Low Cost

5V Power Module

HF-BL100-CU

HF-BL100-CL

HF-LPB105

HF-LPB125

Support

- IEEE 802.15.1 BT4.0 Wireless Standards
- UART Data Communication Interface
- Internal PCB Antenna
- FCC/CE

Support

- IEEE 802.15.1 BT4.0 Wireless Standards
- UART Data Communication Interface
- PWM Output Interface
- Single 1.9V ~ 5.5V Power Supply.

Support

- UART/GPIO Data Communication Interface
- Wireless and Remote Firmware Upgrade Function
- Single +5V Power Supply, +5V UART Voltage.
- Internal/External (I-PEX) Antenna Option

Support

- Cost Effective Solution With High-Flying MCU: MC101
- Low-Power Applications with Excellent Power Save Scheme
- Multi-TCP Client (Upto 5) Application
- FCC/CE Certificated

IOT Module Evaluation Kit
