

## Pedigree Technologies OneView®

Pedigree Technologies OneView® empowers organizations to locate, track, monitor, and diagnose fixed and mobile equipment and property, connecting the mobile workforce and resources in the field to the enterprise in real time to save money through streamlined operations.

Pedigree's M2M solutions drive operational success throughout the service chain using mobile computing, machine-to-machine communications, and cloud applications.

Meet Jack and learn how he uses common technology like cell phones and tablets to get a real-time connection to his assets and machines and an integrated view of his operations.

### An integrated M2M + cloud + tablet solution

Built on a unique and scalable platform, Pedigree's suite of cloud- and tablet-based applications brings together disparate information to help companies increase operational efficiencies, improve workflow, manage inventories and logistics, and maintain equipment—all in one simple system.

#### Asset Tracking

Remote asset management lets you track and monitor your powered and non-powered equipment and assets in real time so you know where it is, where it was, and where it's going.

#### Dispatch & Field Communications

Advanced two-way communication between dispatch and truck, real-time vehicle status updates, and automated route optimization for more efficient dispatch operations.

#### Energy & Utilities

Reduce energy consumption with continuous equipment health monitoring, utilities sub-metering, equipment inventory tracking, and automated maintenance scheduling.

### **Fixed & Mobile Equipment**

Know where your equipment is and what it's doing with engine hour/runtime reporting, real-time GPS tracking and geo-fencing, maintenance data history, fluid level monitoring, and location reports.

### **Fleet Management**

Eliminate out-of-route miles, streamline FMCSA compliance reporting, improve driver performance and automate workflow with smart fleet management operations.

### **Inventory Management**

Reduce costs and eliminate run-outs with a real-time, turnkey inventory management solution that allows remote tank monitoring and just-in-time replenishment for mobile or rolling stock.

### **Machine Health Monitoring**

Continuously monitor critical machine health indicators, including fluid levels, for a 360-degree view of all your equipment. Let the machines call you when there's a problem.

### **Maintenance Management**

Improve profit margin with automated maintenance scheduling, equipment inventory tracking, and premium service contracts that guarantee predictive maintenance.

### **OneViewPOV**

Manage your fleet operations and produce electronic driver logs to meet FMCSA compliance regulations with the OneViewPOV suite of cloud- and tablet-based applications.

## **M2M + Cloud + Tablet**

Don't waste money on dedicated hardware for fleet management when you can do so much more with a more affordable Android tablet.

Pedigree Technologies OneView brings together disparate information to help companies increase operational efficiencies, meet federal regulations, manage logistics, and maintain equipment — all in one simple system.
