

Intelligent Video Surveillance Solutions

May 2010

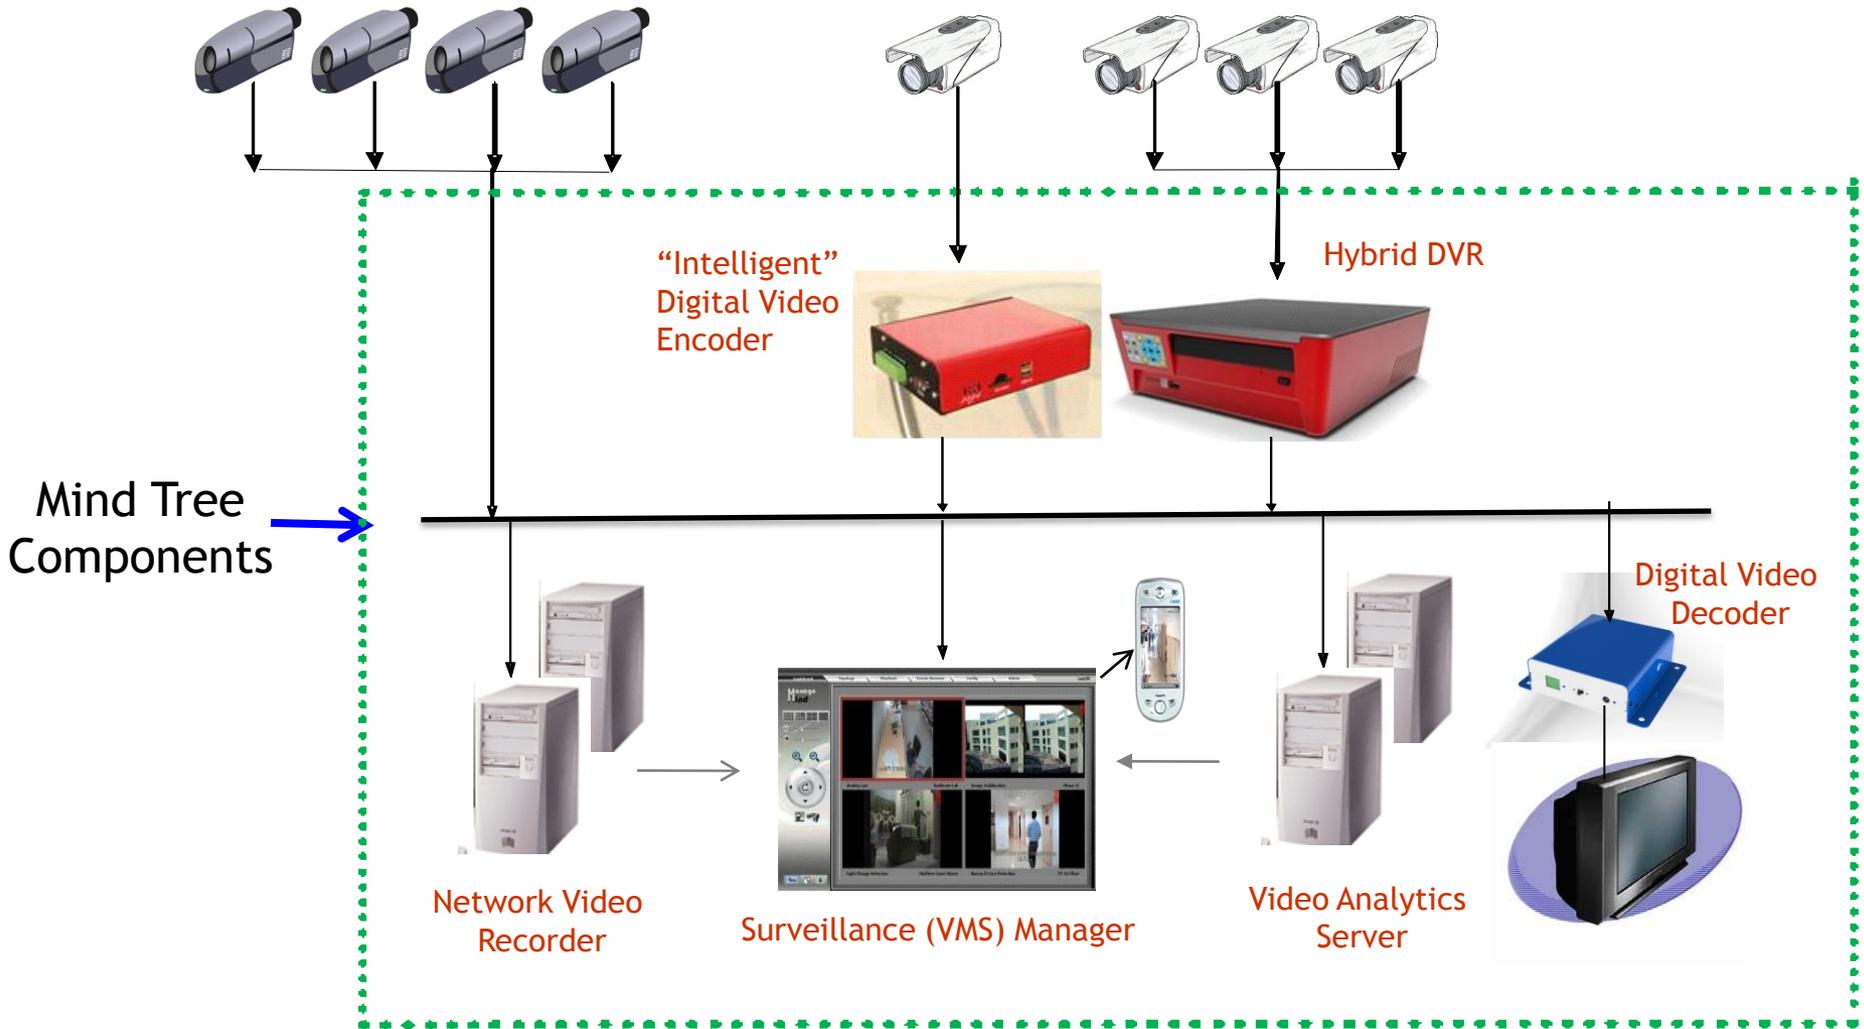

- Largest portfolio of Ready-to-Brand licensable components that enable OEMs and system integrators to introduce their own products
- Committed & Sustained Roadmap
- Multiple Licensees
- 3 Patent Applications*
- Member of Open Network Video Interface Forum and Physical Security Interoperability Alliance

*Patent Process In progress

Intelligent Video Surveillance System

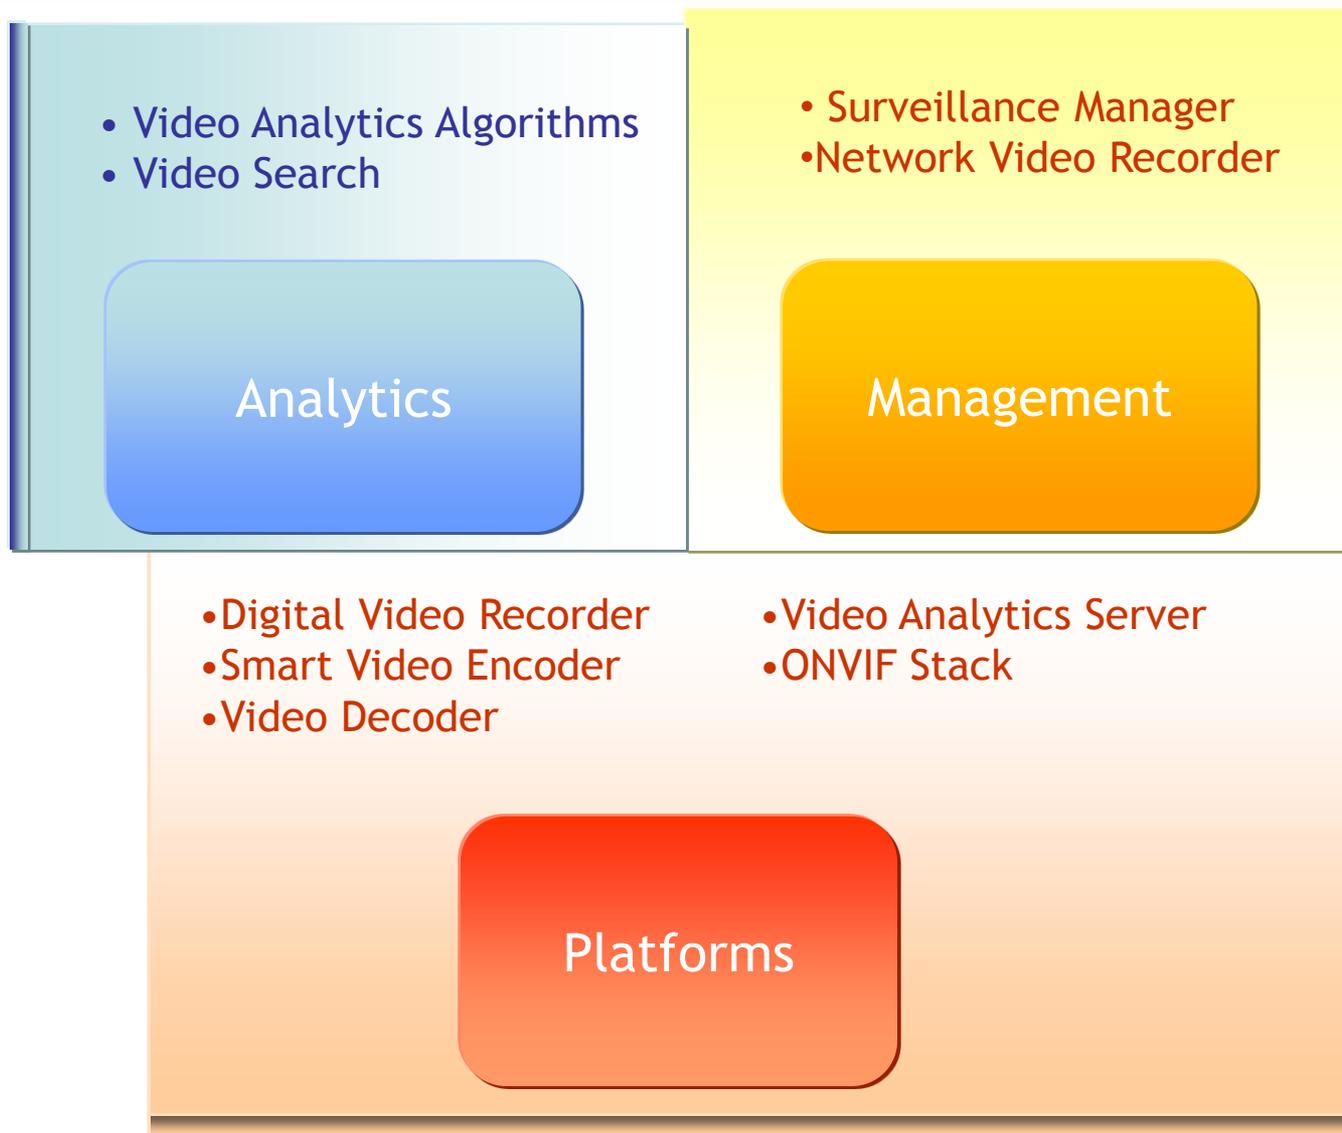

Standards Based

Intelligent

Scalable

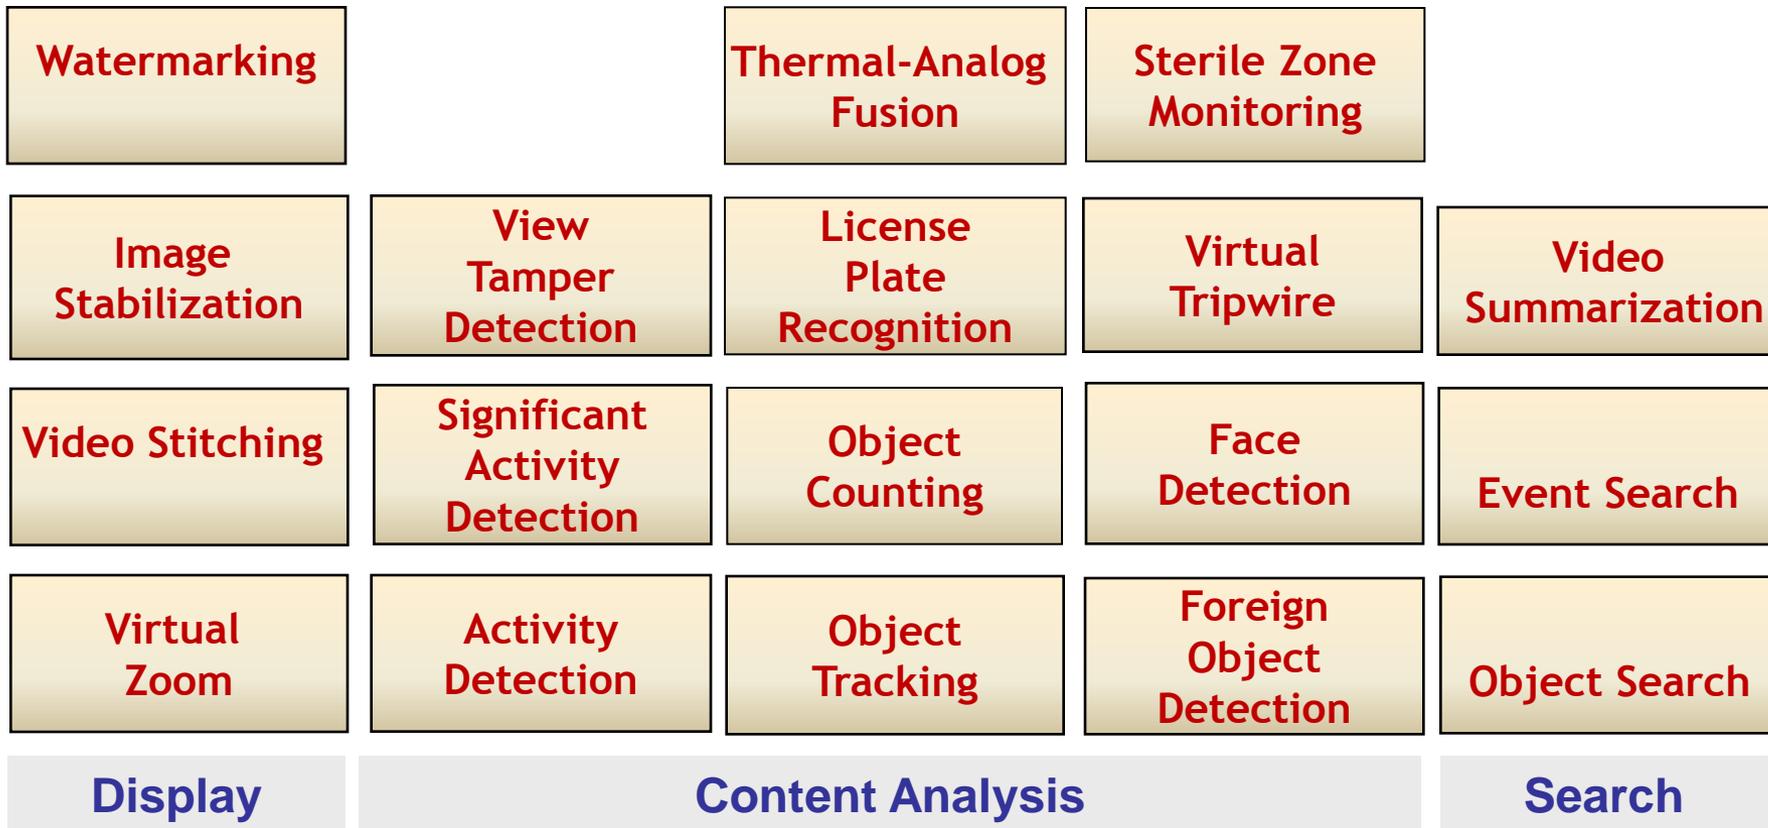

Distributed

IP Ready

SecureMind Video Analytics Algorithm Suite (VAAS)

SecureMind : Key Features

Low Complexity Patented Real-Time

- Works in Real-Time at CIF resolution
- Efficient Usage of Processor Power And Memory
- Algorithm Independent of Platform And architecture
- Optimized for TI DM 64x and Intel

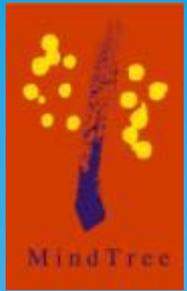

Flexible Deployment Rules Support

- Deployable for Edge Based Analytics or Server Based Analytics
- Indoor and Outdoor Usage
- Minimum Calibration and Training
- User Defined Rules and Regions
- Tunable Algorithms
- ONVIF Compliant
- Integrated with VMS

Algorithms

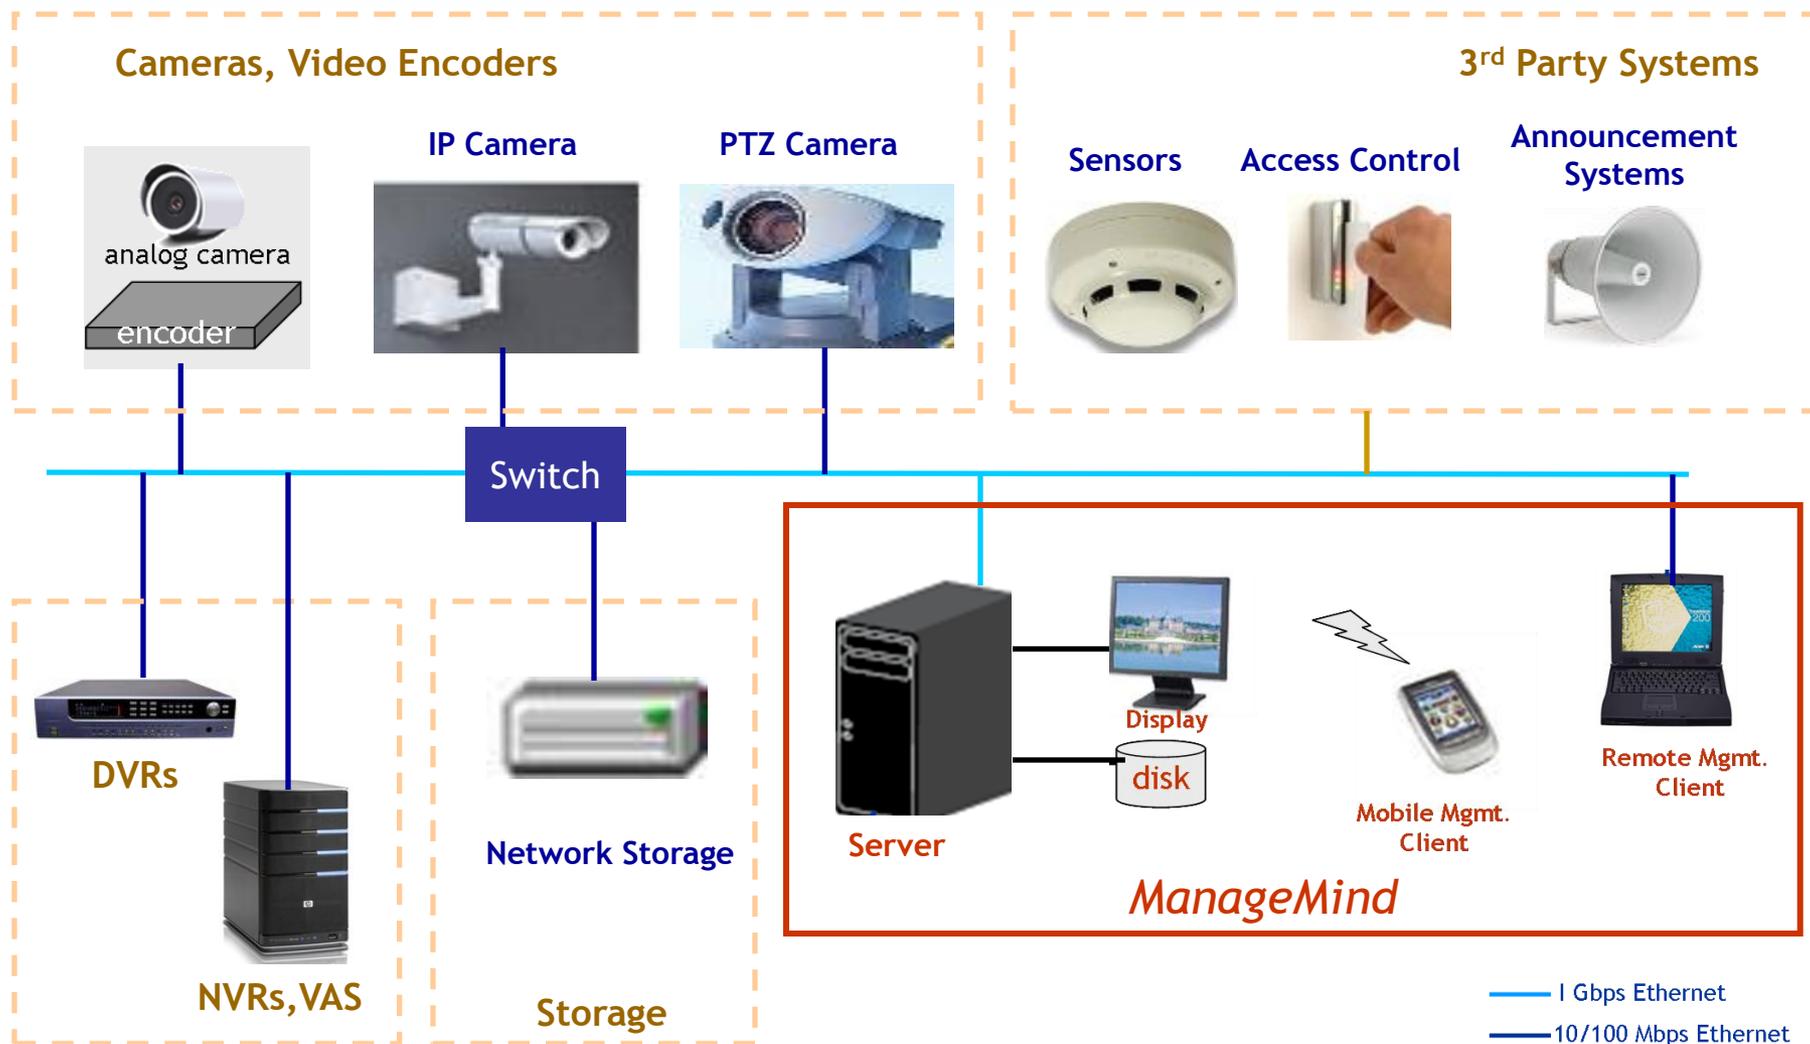

Porting & Optimization

Custom Solutions

ManageMind Surveillance Manager (SM)

ManageMind: Topology

Observe, Analyze, Alert, Record, Manage

ManageMind: Key Features

Display

- Live video: Full screen, tiled modes
- Real time & recorded alerts, alarms, events and reports
- Topology
- Real time status

Recording

- Linear, continuous, scheduled
- Overwriting based on policy
- Record if activity is detected
- Record if human or vehicle activity is detected

Configuration & Control

- IP camera, video encoder, DVR, storage, network element settings
- Users, groups, roles, ACL
- Display & recording
- Events, alarms, alerts & rules

Search & Playback

- Fast search on recorded video, alarms & events
- Device independent search
- Search on date, time range, camera, meta data & alarm
- Forward, rewind & pause - playback controls
- Video Mining

Events

- Event and alarm management
- Event & alarm search
- Historic alarms
- Event & alarm action - Email/SMS/MMS/trigger relay

Administration

- Fault log management
- Storage management
- Network management
- Scheduled/automatic back up
- Performance

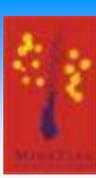

Centrally Manage
Diverse Elements

Highly
Scalable

Powerful
Search

Analytics as
plug-ins

ManageMind: Key Features

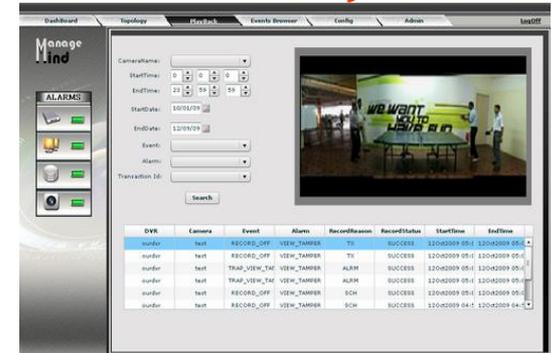

Display: Video Web Client

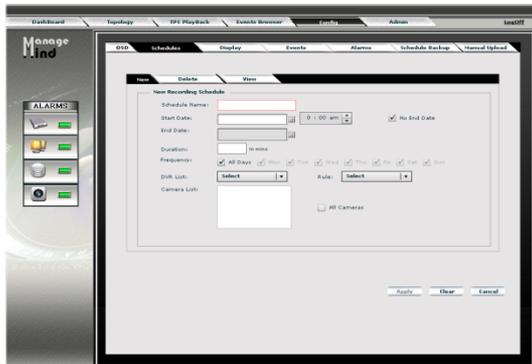

Display: Mobile Client

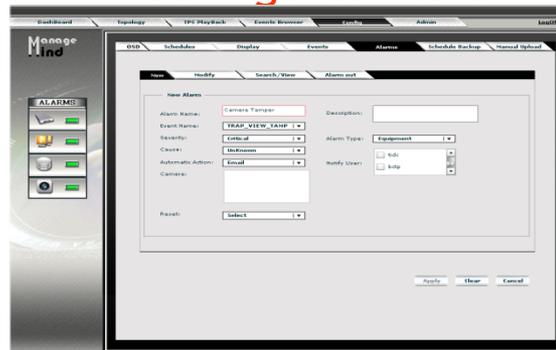

Search & Playback

Record

Configure: Alert

Display: Events

ManageMind Lite

ManageMind

ManageMind : Key Benefits

Open Architecture

- Web Based System
- Runs on COTS Hardware/Software Platforms
- Standards Support

Device support

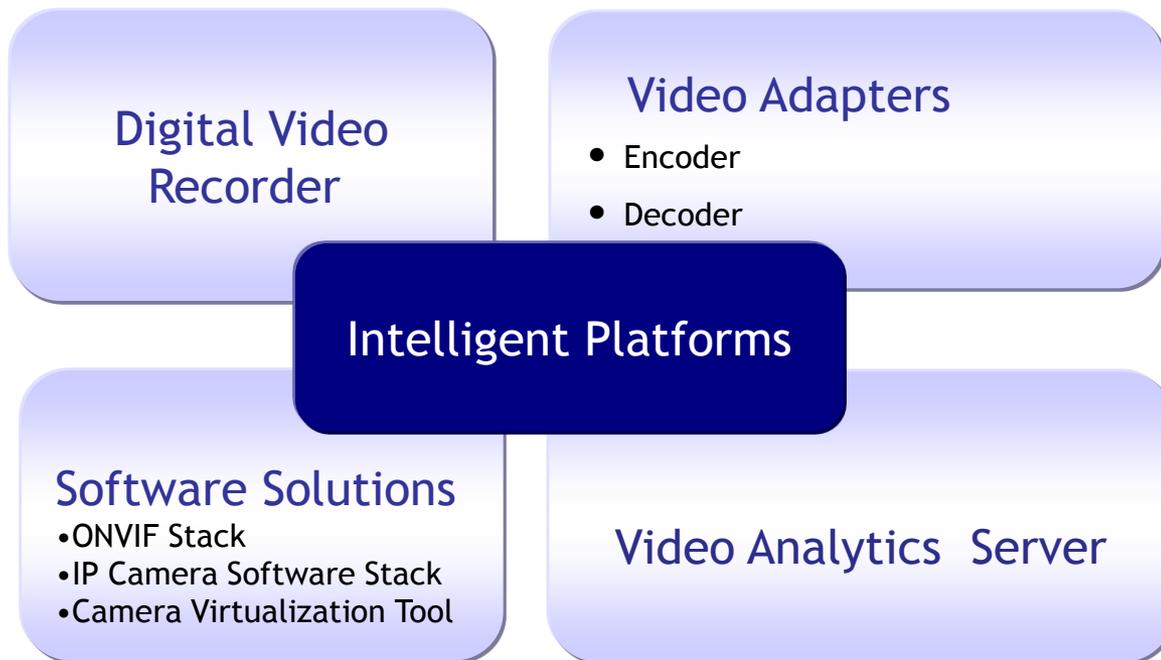

- Manage DVR, NVR, DVE, IP Cameras, networking and Storage equipment
- IP Cameras - Axis, Basler, HikVision, Pelco

Scalable

- Distributed and Scalable Architecture
- Powerful Search and Archiving

Platforms

4 Channel Hybrid DVR

Encoder

Digital Video Recorder - Key Features

Video

- Composite Video In (NTSC/PAL)
- IP Camera Support
- Codec : H.264
- Resolution : D1, CIF, QCIF
- FPS : 30 / 25 (PAL)
- Video Streaming at 2-3 Mbps

System/Storage

- Security Console
- IR Remote Control
- Alarm I/O, PTZ, Audio
- SATA based HDD Support
- S.M.A.R.T support
- Archival to USB, DVD
- ISO 8583 Support (optional)

Security

- Detection of View tampering
- Video Watermarking
- Remote Backup & Recovery
- Access Control
- Secure Data Transmission (optional)

Analytics

- Video Content Analysis Algorithms
 - Activity Detection
 - Object Classification
 - Tracking
 - TripWire
 - Foreign Object Detection
- Video Search

Management

- ONVIF, SNMP Support
- Comprehensive Alarm Management
- Support for Multiple camera, DVR configurations
- Dashboard, Topology and Administration
- PC and Mobile Clients

Network Video Recorder

All Features
Accessible from a
Standard Browser

Runs on COTS
Linux Server
RHEL5, Suse

Record up to 64
Channels per
Server

Supports
H.264
MPEG-2/4

Recording Modes
Manual
Alarm triggered
Scheduled
Significant Activity

Supports
Networked Hard
Drives
RAID Storage

Synchronized
Audio Video
Recording

Camera Encoder - Key Features

Video

- Up to 4 Composite Video (NTSC/PAL) In
- Codec : H.264
- Resolution: D1, CIF, QCIF
- Video Streaming : 2-3 Mbps

System

- Alarm I/O, PTZ, Audio
- Local Storage : SDHC
- GPS, Accelerometer, sensors (Optional)
- SNMP Support
- Integrated with VMS

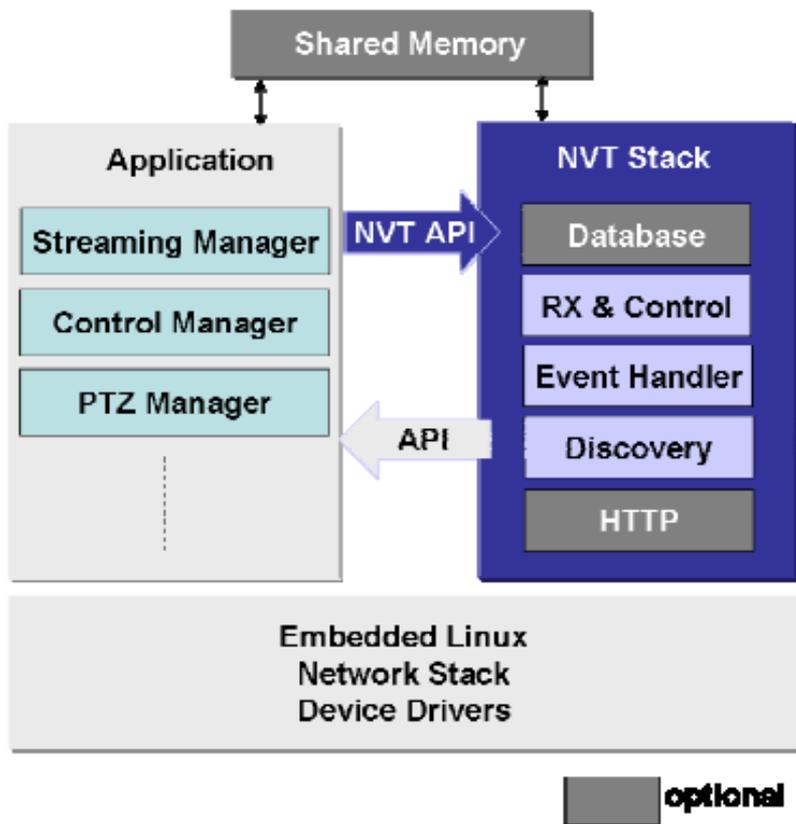

Analytics

- Basic
 - Significant Activity Detection, View Tamper, Watermarking
 - Per Channel
- Advanced
 - TripWire, Foreign Object Detection, Face Detection
 - 2 Channel support

Form Factor BOM Optimized Design

ONVIF Stack

Sample NVT Stack Architecture

 NVT Deliverables

- Compliant to ONVIF 1.01 Version
- NVT
 - Ported on Embedded Linux, Windows
 - Portability Considerations
 - ANSI C Code
 - Low Foot Print
 - Low Latency Architecture
 - Customizable (external) interfaces
 - Camera Configuration Layer
- NVC
 - C Library on Windows & Linux
 - Web Based Clients
- ONVIF Forum Test Tool Certified

1. Bangalore Traffic Police

- Manage data related to traffic incidents and generate tickets for traffic violations automatically
- Significantly reduce manual effort spent in generating tickets, backlog of tickets to be generated eliminated
- Easy status tracking of tickets
- Producing evidence of the incidents
- All data related to traffic incidents annotated, indexed and backed up for easy retrieval

3. ONVIF Library for IP Camera

- High-end IP camera with advanced video analytics
 - Resolution: D1 and HD
 - Compression: H.264
 - Power over Ethernet, GPS, Zigbee
 - Wireless-enabled
- Licensed MindTree ONVIF Library to make it ONVIF compliant
- Reduced engineering time by several months

2. MindTree Campus Surveillance

- ManageMind VMS, NVR and SecureMind Video Analytics used
- Complete video installation management by ManageMind
- Video Analytics
 - Activity detection with Region of Interest selection
 - View Tamper Detection
 - Guard Presence Detection
- NVR for control of all cameras (IP cameras)

4. Image Stitching Algorithm

- Licensed MindTree's Real-Time Image Stitching Algorithm that combines videos from multiple cameras with overlapping views to create a single View
- Can handle images from up to 3 cameras
- High quality stitching even when video has moving objects
- Supports different camera positions: co-located & stereo-view
- Minimal ghosting artifacts
- Dynamic feature matching and blending - no scene training needed

Imagination **Action** Joy

www.mindtree.com

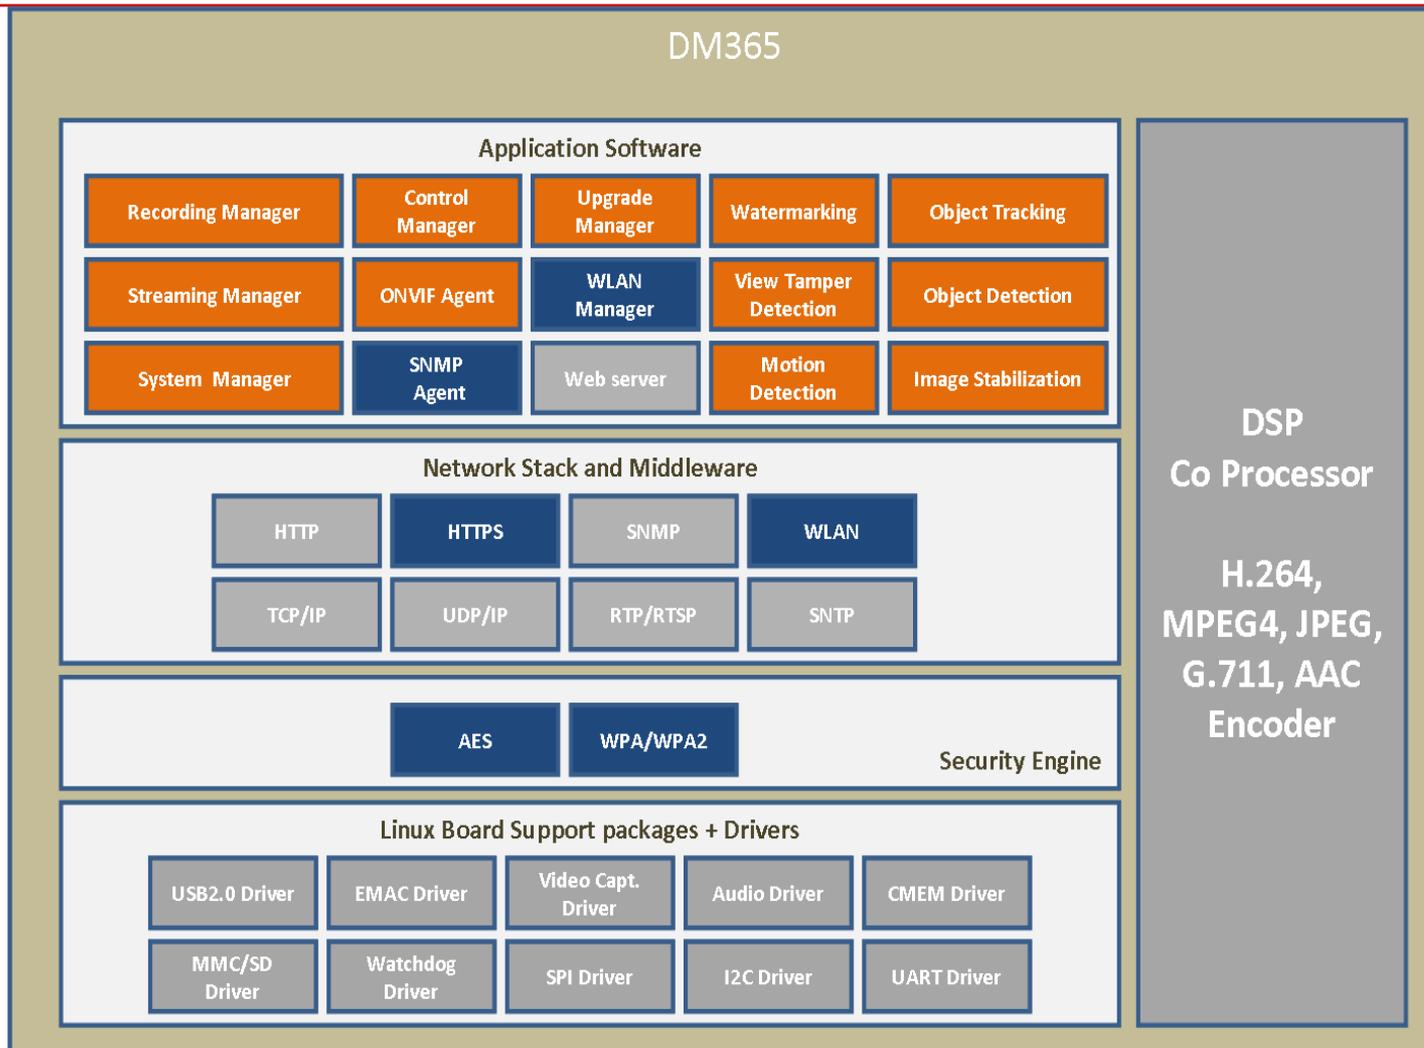

Backup

Available Platforms	TI's DM6467, Intel (Windows)
Video Input	Raw or Decoded Video at 25/30FPS
Video Format	YUV 420, 422, RGB
Resolution	CIF
Integration Options	IP camera, Encoders, DVR, NVR, Management Server Protocols - SNMP / ONVIF
Region of Interest (Rol) Support	Yes, with Multiple, overlapped Rol
Overlay	Yes

IP Camera Software Stack

MindTree

Open Source/PI

Optional

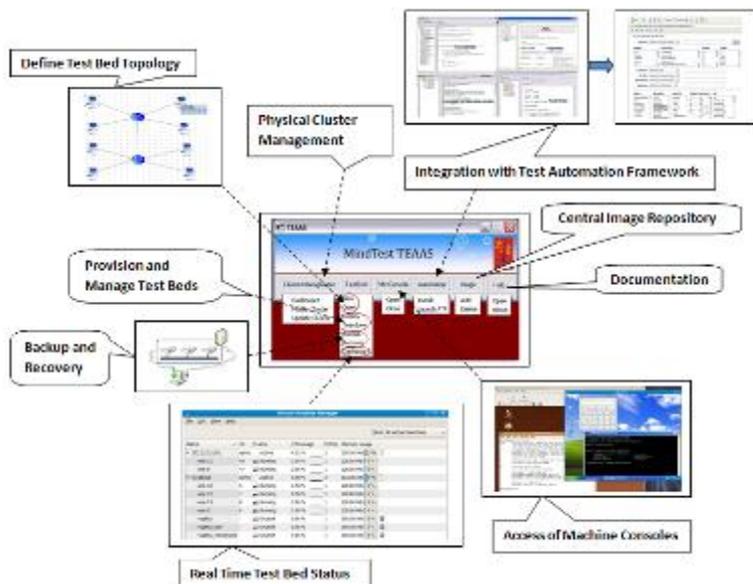

Camera Virtualization Solution

- Setup 100s of IP Cameras, DVRs, NVRs, Servers to simulate real-world scenarios!!

Camera Virtualization

- Create Virtual IP Cameras with data and control capability
- Combination of Virtual and physical devices

MindTree Virtualization Framework
